GitHub: https://github.com/Omkar2629 Mobile:+91 7815033243

SKILLS

Languages: Python, C++, C, Java
Web Technologies: HTML, CSS, Django
Databases: MySQL, PLSQL
Data Science and ML: NumPy, Pandas, Scikit-Learn, Seaborn, Power BI, Excel
Soft Skills: Problem-Solving, Team Player, Quick Learner, Adaptive

INTERNSHIP

Null Class – EdTech Company | GitHub (Mar' 25 – Jun' 25)

- Cleaned and pre-processed large-scale Twitter datasets to ensure high data quality and analysis readiness.
- Conducted exploratory data analysis to uncover engagement and sentiment trends, improving content strategy insights by 20%.
- Built 5+ interactive Power BI and Tableau dashboards, cutting manual reporting efforts by 40%.
- **Tech:** Power BI, Tableau, Python Libraries.

PROJECTS

Authentication Utilities (CAPTCHA & Password Validation) | GitHub Nov' 25

- Developed Python-based authentication utilities including an alphanumeric CAPTCHA generator and a password strength checker to enhance user security.
- Implemented configurable CAPTCHA generation using random and string libraries to prevent automated access.
- Built rule-based password validation to evaluate length, case sensitivity, digits, and special characters, providing real-time strength feedback.
- **Tech:** Python

UK Train rides (Sentiment Analysis) | GitHub Oct' 25

- Conducted comprehensive Exploratory Data Analysis (EDA) on UK train rides dataset (2024) to identify patterns, delays, and key factors affecting travel trends.
- Built predictive models using Regression, KNN, and Naive Bayes for data analysis.
- Performed sentiment analysis on customer feedback to evaluate service satisfaction and uncover insights for improvement.
- **Tech:** Python, Python Libraries

Crop Disease Detection System | GitHub Aug' 25

- Built an early crop disease detection system in C using optimized DSA, improving data processing speed by ~30%.
- Used MongoDB for real-time storage and retrieval, efficiently handling 10K+ agricultural records with low latency.
- Integrated Python-based ML models for predictive disease classification, enabling future accuracy gains of 15 20%.
- **Tech:** C, Python Libraries, MongoDB, HTML, CSS

CERTIFICATES

- Automation Theory – Infosys Sept' 25
- Prompt Engineering – Infosys Sept' 25
- DSA in C language – Lovely Professional University Jun' 25
- Computer Networks – Coursera Dec' 24

ACHIEVEMENTS

- Earned stars and money for freelancing on **Froage** and **Fiverr**. Sept' 25
- Secured the top 10000 emerging traders in India by **Groww**. Jan' 25
- Cleared technical round for **Amazon Mechanical Turk**. Jun' 24
- Secured 3rd place in **Pentaomnia** Hackathon. Feb' 24

EDUCATION

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.7*** *Aug'23-Present*
- **ODM Public School** Bhubaneswar, Odisha
  Intermediate; ***Percentage: 75.2%*** *Jun'21 – Mar'23*
- **Vimala Convent School** Bhawanipatna, Odisha
  Matriculation; ***Percentage: 92%*** *Mar' 21*
